Starting with January 1954, "other countries" includes, in addition to shipments to nonlisted countries, those shipments to listed countries that are valued at less than \$500 each when the number of such shipments to a country in a given month is few. This change results from sampling procedures adopted by the Bureau of the Census.

Trade tables on Germany relate to East and West Germany for the prewar period; 1950-54, Western Germany only, except where specified.

SOURCE

United States trade statistics compiled from the Bureau of the Census. Trade in foreign countries compiled from official sources.

This compilation is not intended as a replacement for the source material and is prepared as a ready reference for those in export trade.
